Capabilities Keywords

Paint and coating, dopes, varnishes, & related products

Capabilities Narrative

We manufacture and install an Eco-friendly roof system. Our product "Final Flat Roof"(FFR)is the only roof product in the world that can be installed underwater and extend its life up to 20 years. FFR is an EPA listed & Energy Star Rated product. FFR is also UL listed and the only roof system in the world endorsed by the GEC (Green Energy Council). FFR is low VOC and title 24 compliant. No tear off needed, which helps reduce our dependency on Foreign Oil & keeps 20 million tons of toxic roofing out of our landfills every year. FFR is applied with a paint roller, no special equipment needed. You can easily install the FFR system yourself. FFR is 40-60% less than a re-roofing and can also water proof Metal, Concrete, EPDM, Single Ply & all petroleum based roof systems.
